DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 are allowed.

Examiner's Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to render obvious the claimed semi-active radar guidance system including, inter alia, first means responsive to vibration-induced changes in the automatic frequency control (AFC) circuitry and generating a control signal and second means for correcting the polarity of the frequency control signal as claimed.

The prior art discloses AFC circuitry in missile guidance radar systems.

Exemplary of the prior art is US 3569965 A to Bagley, who shows an AFC circuit (36) in a missile guidance system as shown in Figure 1 (reprinted below).

However, Bagley fails to render obvious the claimed method and apparatus for addressing the problem of phase reversal of the reference signal for the AFC circuit via correcting the polarity of the frequency control signal as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Sotomayor whose telephone number is 571-272-6978. The examiner can normally be reached on Monday to Friday from 8:30AM to 5:00PM.
